BRIQUETTES

Briquettes are most suitable for home gardening, hydroponic growing and also used in nurseries as potting soil base. And it is also widely used for retail selling purpose across the world.

The briquettes weigh approximately 650 grams and are more finely compressed than the blocks so that transport can be organised more efficiently. Washed, buffered or unwashed coco peat is available in briquette form. Where packaging is concerned, various options are possible; on pallets, in cardboard boxes, sealed and possibly provided with a sticker or label; the choice is all yours.

PACKING

- Palletized and strapped
- Individual Shrink wrap with labels.
- Unwrapped briquettes or briquettes packed in woven bags / carton box.
- Unwrapped loose stuffing

COCO DISCS

Coco discs are pressed discs of carefully selected coco peat. They are suitable for gerbera cultivation, as well as for other floriculture crops and potted plants.

Coco discs consist of coarse coco material, which is made of the husk of the coconut. Cutting the husk creates an airy, easily manageable and powerful growing medium with good drainage properties.

Coco Peat Discs are made mainly for commercial use and are most suitable for home and terrace gardening. They are easy to use and are allowed to soak in water until the particles expand completely.

And it is also widely used for retail selling purpose across the world.

Specification
